I like your name -- it fits your energy level! I want to say thank you for all the time you spent with us yesterday. I learned a lot about local 150, and it will benefit our high school students.

I really appreciated the time you took to show us how GPS/GIS works for surveying. Also - to hear how important math skills are for your job (and that you are the "numbers guy") is such good information to be able to communicate to high school students. Thank you for spending the day educating us!

Hi Mike ☺

June 19, 2009

I want you to know how much I appreciate the time you took to orient us to your program at local 150. I will always remember yesterday because I never dreamed I'd be able to drive an articulated dump truck -- or a skid... especially the truck!

Also -- you are such a patient, down-to-earth person, and when that skid was "bucking", I was thankful for that. You are a good teacher -- so it makes sense that one of your sons is a teacher.

Thank you again!
"brenda C-C"
