

Subject: Layne Safety Training Day

Mike,

Thank you very much for the hospitality and sharing of your superb ASIP Training Facility for our Layne Safety Training Day on November 12, 2010. The significance of 150 and Layne working together on this was very clear to our men. I'm sorry the severe weather between Kansas City and Joliet caused the pilot to cancel the flight up of our CEO, Andy Schmitt. I had described your exceptional facility and he was looking forward to seeing it, as well as speaking to our men about safety and giving an overview of Layne's world-wide operations.

A special thanks should go to Martin Turek, who worked closely with our Mike Simmons on this project.

Sincerely,

Greg
